

Electromation Pty Ltd.'s Environmental Policy - Providing Sustainable Energy Solutions

At [Electromation we recognise our responsibility to safeguard the environment and contribute to a sustainable future. As an electrical company with a focus on solar energy, we are committed to minimizing our ecological footprint and promoting environmentally responsible practices. Our environmental policy outlines our commitment to sustainable operations and the principles we uphold to ensure the protection of the environment and the communities we serve.

Renewable Energy Promotion: a. **Solar Energy:** We prioritize the development, installation, and promotion of solar energy solutions. By encouraging the adoption of solar panels, solar farms, and other solar technologies, we aim to reduce the reliance on non-renewable energy sources and contribute to a greener, low-carbon future.

Energy Efficiency: a. **Energy-efficient Products:** We commit to offering energy-efficient electrical products and encouraging our customers to make informed decisions to reduce their energy consumption. b. **Internal Efficiency:** We will continuously assess and improve our internal operations to minimize energy consumption and waste.

Sustainable Business Practices: a. **Waste Reduction:** We strive to minimize waste generation and encourage recycling and responsible disposal of materials, both in our operations and through customer awareness campaigns. b. **Water Conservation:** We will implement water-saving measures in our facilities and promote water-efficient technologies. c. **Emission Reduction:** We aim to reduce greenhouse gas emissions in our operations and encourage the same for our customers by offering sustainable energy solutions. d. **Biodiversity Preservation:** We commit to protecting biodiversity by avoiding harm to ecosystems and wildlife in our projects.

Environmental Compliance: a. **Legal Compliance:** We will adhere to all relevant environmental laws, regulations, and industry standards applicable to our operations. b. **Environmental Impact Assessment:** Before undertaking new projects, we will conduct thorough environmental impact assessments to identify potential risks and implement mitigation measures.

Stakeholder Engagement: a. **Community Involvement:** We will engage with local communities and relevant stakeholders to foster understanding, address concerns, and ensure that our projects align with their interests and contribute positively to their well-being. b. **Employee Awareness:** We will train our employees on environmental best practices and encourage them to participate in sustainable initiatives.

Continuous Improvement: a. **Environmental Performance Monitoring:** We will regularly monitor our environmental performance and set targets for improvement in areas such as waste reduction, energy efficiency, and emission reduction. b. **Research and Innovation:** We will invest in research and innovation to develop more sustainable technologies and solutions for the benefit of our customers and the environment.

By implementing and adhering to this Environmental Policy, we aim to become a leading example of environmental stewardship in the electrical and solar energy industry. Our commitment is to work towards a cleaner, greener, and more sustainable future for generations to come.
